Semi Cloisonne pins are made using the same techniques as the Cloisonne, but the recessed spaces are filled with a hard epoxy enamel rather than glass. These pins have all the aesthetic beauty of true classic cloisonne with the benefit of Pantone color matching. The recessed color wells are filled, one color at a time, with enamel. When complete, the pin is placed into an oven to harden. Finally its ground to remove an excess enamels and carefully polished.

Our Cloisonne Hard Fired pins continue the fine art tradition of glass enameling started in China centuries ago. The pins are made from hand-pouring powdered glass into the recessed die struck brass base. The brass can be plated in gold, silver or nickel. After baking at a very high temperature, the glass enamel is sanded and polished to be flush with the metal lines that separate the colors. This gives the pins a smooth, lustrous quality making them prized by collectors. Available colors are limited to a select group of genuine cloisonne glass powders.
