

C.N.I.J.

Without almost 20 years of solid experience in bringing innovative ideas to life, CNIJ would be your partner of choice for any corporate events.

Founded in 1990 by David Pisarevsky and Pini Abecassis; both jewelers then, with a reputation for creative designs. David and Pini decided to combine their knowledge in high quality craftsmanship and unique designs to cater to a growing need in custom made items for all types of events. They have decided to create special unique items which would help preserve special moments.

The company has rapidly grown into a multi million dollar a year company with over ten million different items and being one of the largest manufacturers in it's field. We now have over 100 employees designing, producing and creating custom made items in our Montreal facilities and a plant in Israel to cater to that market and Europe. We benefit from a large manufacturing capacity that would allow us in certain cases to produce within 72 hours. We have had the pleasure of producing unique gifts for a number of companies; some as prestigious names as Ford Motors, Corona beer, Shell, UPS and more. With over 50,000 distributors across North America, we can cater to all different sizes of companies and events, if you have the event we have the unique products that will make you stand out.

CNIJ with its several unique patented designs and production processes has certainly made it's mark in exceeding it's competition. Our manufacturing process is vertically integrated allowing us to create almost anything from the raw material to the finished goods. We specialize in different metals such as pewter, zinc, brass, gold and more. We also have Eco-Friendly products and lead free products. At CNIJ, our motto is "Yes! We can do it" and with reason as we will take on any challenge. From the smallest, to the largest order, we can design and create something unique just for you. We have an item for any budget!

Actively involved in the community, following charity events or cancer awareness, CNIJ prides itself in trying to make a difference and continues to be involved for a better future.

Our service, quality and craftsmanship are beyond compare. This is why at CNIJ, we say "Yes! We can do it."

Yes! We can do it.
