Dawn Dabarno, Black & McDonald...

“For several years we have purchased various gifts for employees and customers – last year we went with something that was a little out of our usual range - the **Kanata Country Lambswool throw**. Although there was some reluctance at first, (there were those that felt it was “too personal”), the over-whelming positive feedback we received was enormous; a second order had to be placed so that we could keep up with the additional requests.

The blankets were shipped to various offices all across Canada and were received with the same positive response, **“classy gift, great quality, cozy and warm and washes up beautifully”**. **It is one of the best corporate gifts we have ever purchased.”**

## Why bamboo?

Bamboo is a sustainable resource that is biodegradable and can be grown without pesticides, insecticides or fertilizers, so benefits our eco systems.

Bamboo protects the air we breathe, releasing 35% more oxygen than equivalent stands of trees.

It can be harvested with virtually no impact on the environment, and without killing the plant, so is ready to be harvested again in just a few months.

Bamboo is more than renewable; some species grow 47 inches a day. Bamboo matures in 3 to 5 years and grows almost anywhere. There are more than 1,500 species of bamboo.

# Kanata making products responsibly.

There are considerable environmental benefits to purchasing a **Kanata ECO** friendly product, using **Repreve®** yarn, created by Unifi, a **U.S. based producer of polyester and nylon.**

**Repreve® is certifiably sustainable.** The U Trust™ verification program ensures that Repreve® recycled fibers (and our fabrics and products) are traceable, transparent, and certifiably sustainable.

Repreve® yarn is made from **100% recycled content...made responsibly, to make a difference and create a sustainable textile solution.**

Post industrial and post consumer waste, including pop bottles (P.E.T.), is ground up and melted into plastic chips from which new fibers are extruded and then spun into yarns. The yarn is 100% recycled which provides huge benefits to the earth and the environment:

- All this recycled waste, including millions of pop bottles, is saved from going into our landfills.
- As a result of the manufacturing and handling processes that are eliminated in the production of recycled fleece, every product using Repreve® yarn conserves petroleum-based resources by offsetting the need to produce virgin polyester.
- On average every pound of Repreve® polyester yarn conserves the equivalent of half a gallon of gasoline.

In addition, the purchase of a Kanata Repreve® ECO product gives back to the environment.

As a member of **1% For The Planet**, Unifi has pledged to donate one percent of annual Repreve® yarn sales to “relieve” our environment. Customers can make a difference by casting a vote for how this is distributed using the code provided on the hangtag attached to their product.

You will save turnaround time, additional freight charges, reduce your paperwork and receive Kanata quality & expertise for the assurance that your logo looks it's best.

### Embroidery Friendly

Your logo is embroidered in one or more colors to complement the tones of your fabric choice and trim, using heavyweight rayon thread, offered in a wide selection of colors.

The Kanata difference is the back of our embroideries. Using high quality tear away backing and bobbin matching, wherever possible, on the reverse side, the back side of our fabrics always has a clean appearance.

Trapunta - Our patented "Trapunta" embroidery creates a debossed look.

Embroidery Front

Embroidery Back

No underlay - fine lines and text "sink" into the fabric

With underlay - detail and text is very clear and the logo is more striking.

### Kanata's embroidery expertise

recommends that, when embroidering on Velura™ or higher nap fabrics, an underlay stitch is used to "flatten" the fabric for a crisp, clear embroidery.

Please note - adding underlay to an embroidery will result in additional charges. Existing embroidery tapes may not be suitable when embroidering on higher nap fabrics.

### Lasering on Boxes

Available on wood packaging options and on keepsake boxes. Please note on wood boxes, the wood grain may affect the finished look of the lasering.

Lasering on keepsake box.

### Lasering on Fleece

Laser your design onto a fleece blanket for a unique look that is visible on the front side only, leaving the back clean and smooth.

Decorate the tote bags with a clear vinyl decal.
