Product Safety and Social Compliance

Fields Manufacturing, a Minnesota based supplier to the Promotional Products Industry is committed to providing only products that meet or exceed all safety and social compliance laws as set forth by the Food and Drug Administration (FDA), CPSIA, the Federal Food and Drug Cosmetic (FD&C) Act, and Proposition 65. These laws are designed to protect consumer health and safety in addition to ensuring a safe and socially acceptable work environment for those involved in production. Fields warrants that all products meet these important standards.

In support of our commitment, **Fields** regularly verifies proper compliance certifications for products received at our warehouse from our overseas and domestic suppliers. As an added level of assurance we have our products tested by a certified independent 3rd party laboratory prior to shipment from our overseas vendors.

Fields Manufacturing follows the tracking label requirements as outlined under CPSIA. All products identified for children under 12 can be tracked with the following information:
consumersafety@fieldsmfg.com SO#xxxxx

Overseas factories are visited on a yearly basis and comply with all social compliance laws. **Fields** requires all of our manufacturing partners to provide us written documentation supporting compliance to applicable laws governing safe and socially acceptable conditions inside the factory.

Fields places a high priority on sourcing materials that are Earth friendly and also practices good internal recycling habits. We are committed to being a part of the environmental solution.

Fields appreciates your inquiry and invites you to contact us if you have any additional questions or would like a copy of documentation specific to your needs.

Be an Expert! Try this on any notepad with a glue track.

For best sticking results. Remove note from the adhesive track, as shown below. Lift paper with a slight downward and sideward pull. The note you removed will stay flat as shown and will provide superior sticking results.

If you remove any note, with a glue track, by lifting the paper using a straight upward motion, as shown below, it will cause the note to curl.

Lifting paper with a slight downward and sideward pull.

Stays flat like above.

Lifting paper with a straight upward pull.
