# Eco Drives

Each flash drive saves many trees in reducing the need to print documents. Now they just got even more ECO Friendly with these new exciting trendy styles. With great branding areas and vibrant colors all made in 100% recycled plastic.

What happens with old electronic items eventually? With all our ECO drives the final destination is less of a problem for the environment because we only use RoHS standard internal components. **RoHS is the Restriction of Hazardous Substances** and this means no Lead in the solder of the circuit boards and no toxic dyes or lead or restricted heavy metals used in any part. In short they are as Green as we can make them.
