*CALIFORNIA PROPOSITION 65 WARNING

Proposition 65 is a California law that has been in effect since 1986 to promote clean drinking water and keep toxic substances that cause cancer and birth defects out of consumer products. Proposition 65's formal title is "The Safe Drinking Water and Toxic Enforcement Act of 1986." It is administered by Cal/EPA's Office of Environmental Health Hazard Assessment (OEHHA).

The law requires that anyone at reasonable risk of exposure be informed when substances classified as toxins are present. Since enactment, it has been the reason for the addition of notices of specific contents to consumer product labels. Along with the added label requirements, an official list of implicated substances is maintained and made publicly available. To date there are over 700 chemicals listed, and entries are added or removed based on current scientific information. All substances listed show their known or suspected risk factors, a unique CAS chemical classification number, the date they were listed, and if so, whether they have been delisted.

The Magnet Group is committed to complying with all aspects of Prop 65. For further information please feel free to contact TMG at 1-800-458-9457.

ART REQUIREMENTS

Please submit original art files to: art@themagnetgroup.com. If revised art is sent, it is the customer's responsibility to advise Customer Service of the new art. Changes to previously sent art must be sent to Customer Service to ensure use of new art. Art resubmission charge of \$10.00 (S) will apply.

We accept electronic artwork on CD, DVD and e-mail (file size permitting). We have an FTP site available, please call for login details. Include a hard copy or PDF of artwork with Innovations orders.

- Be sure to send all linked files, including all TIFF and EPS files for artwork placed in your document even if previously embedded, as well as all printer and screen fonts used.
- Send only original, native vector files.

We support the following software for Macintosh:

- Adobe Illustrator
- Adobe Photoshop
- Adobe Acrobat
- QuarkXPress
- Adobe InDesign

Acceptable File Types:

- Vector (preferred)
- TIFF (minimum 300 dpi resolution)
- EPS (minimum 300 dpi resolution)
- JPEG (minimum 300 dpi resolution)
- PDF (Press Quality)
- ZIP (compression file)
- Stuffit (compression file)

Microsoft electronic files generally are not acceptable as output for print production. However, black-and-white files can be output from a high-quality laser printer and then used as camera-ready artwork.

Camera-Ready Artwork

Camera-ready art is artwork that can be scanned without further preparation or changes. Halftones (screens) will not photograph well and should be avoided. We will accept camera-ready artwork that is already separated or that includes black line work (or key lines) to separate each color. "Camera-ready" art should be clean, black, and crisp on a smooth white background that requires little or no touch-up. (Original art or PMT's are best.) Artwork must be submitted 1/4 of the finished printed size (for large prints) or large enough to fit on 8.5" x 11" page size. Please avoid submitting artwork that must be enlarged more than 400%. If appropriate quality or size specifications are not met, an art charge will apply. This will be determined once artwork is received.

The Following Artwork is Not Camera-Ready:

Drawings, letterhead, photocopies, business cards, faxes, and low resolution laser printed artwork that is not 1200 dpi are not considered camera ready artwork. (Recommendation: Black and white 1200 dpi laser prints at 200% larger than actual size to be imprinted).

Hard Copies

Hard copies are not required on every order; however on the hard copies we receive Innovations® will review but will not proof against electronic art sent. Innovations® offers several types of proofs that can be done if needed (additional charges may apply).

Art Charges

If art requirements are not met, art time will be billed at \$40.00 (S) per hour. Factory WILL NOT be responsible for charges due to "clean-up" or rework deemed necessary to meet production standards.

Typesetting

We will typeset up to 3 lines for FREE. All other typesetting (including copy changes) will be billed as needed \$40.00 (S) per hour. The typeset must be indicated, or it will be left to the discretion of the typesetter. Charges less than \$40.00 will be processed without notification.

Type Size

- 6 point for pad printing and 7 point for laser inprinting.
- Small registers/trademarks with fine lines may appear as a dot on product.

Serif Fonts

- Please avoid using fine serif fonts. These fonts are usually too thin and fill in or lose detail in the printing process.

Line Thickness

- Minimum line thickness: 5 point.
- 1 point minimum line thickness for reverse copy or art.

Additional Art Requirements

- Pad Print
 - Buff register not recommended. Please call for assistance.
 - Trapping: 1 point minimum. If art is too fine we will overprint. Trapping may cause a color change where colors meet.

Helpful Hints

- EPS (Encapsulated PostScript) file format is used to transfer PostScript image information from one program to another. The file includes PostScript code plus a low-resolution representation of the image. Logos, illustrations and graphics that will be color separated should be saved as EPS files.
- TIFF (Tag Image File Format) is a widely used file format for exchanging bitmapped images (usually scans) between applications. Black and white line art or grayscale images should be saved as TIFF files.
- All grayscale artwork must be saved at the size of the finished document at a minimum of 300 dpi—black and white line art at a minimum of 1200 dpi.
- Please submit TIFF files as a layered document, in case last minute modifications are required.
- Always provide a list of fonts used within a document. This allows output technicians to download the appropriate fonts to their image setter or output device. Remember to list all fonts used with imported illustrations, or the output device may substitute a different font.
- When supplying PostScript fonts with a job, be sure to supply the printer fonts (also called outline fonts) and screen fonts (bitmap fonts). Both must be available for proper output.
- When supplying fonts, be sure to supply those used in the creation of EPS files. (They will not show up in your page makeup application on the list of fonts used.)
- We do not accept TrueType or PC based fonts. Convert to outlines.
- Specify fonts and their style (bold or italic, for example) by using the long menus in your publishing program rather than selecting bold or italic by clicking on a style bar. The menu selection will give you a more accurate representation of the font and style desired. On the Mac platform, clicking on the style bar allows you to select styles for which fonts don't actually exist.
- Limit the number of fonts used in each job.
- Avoid using fine serif fonts. These fonts are usually too thin and fill in or lose detail in the printing process.
- Avoid saving EPS files within EPS files. Avoid transparencies and Illustrator filters to create shadows; they convert to low resolution files.

We support the sm@rt program to improve artwork readiness. We accept artwork prepared by these standards. Please visit the website www.smart-artwork.com for more information.

ARTWORK STORAGE

Artwork will remain on file for 1 year. You must resubmit art after that time.

COPY CHANGES

See individual items.

INK COLOR CHANGES

\$25 (G) to change the color of ink being printed using the exact same artwork on the exact same item. (For example, if someone wishes to the same logo in green on 250 pieces and red on the other 250 pieces of the same 500 piece, 1 color imprint order, they would be charged \$50 (G) set up charge and a \$25 (G) ink color change charge in addition to the normal 500 piece unit price.) PMS color match charges and additional color running charges, if applicable, will apply.

PROOFS

Online proofs are no charge. E-mail or fax proofs requested to be sent outside of our online system will incur a \$10.00 (X) charge.

Changes may delay production and shipping.

Cancelled orders may be subject to a minimum \$25.00 (X) restocking fee.

ART RESUBMISSION CHARGE

When new artwork is submitted a \$10.00 (X) charge will be applied.

* Changes to previously sent art must be sent to Customer Service to ensure use of new art.

Because the colors below are printed in four-color process, they are not exact representations of the colors used.

PMS AND 4-COLOR PROCESS COLOR MATCHES (Non-Stock Colors)

\$18.75 (G) per color. If a non-stock color or PMS number is listed on P.O., the requested color will be used and a PMS charge will apply. Color matches are not guaranteed due to variations in inks and raw materials. Lamination may also slightly alter color(s). We will use the ink color requested and match as close as possible. For PMS color matches we recommend that a product proof be produced to ensure colors are correct. (Metallic and fluorescent colors are not available with digitally printed four-color process imprint.)

To insure repeat orders match the previous color, material specs, etc., please include a sample of the previous item with the new order. Due to variations in inks, materials, and press runs, an exact match to previous orders is not always possible.

MAXIMUM IMPRINT COLORS

In most cases, a maximum of 2 colors per imprint location is suggested. For additional requested imprint colors, please contact Customer Service.
