Why only offer a digital catalog? We have not printed a paper version of our catalog since 2005 because as we are constantly improving our artistic & engraving capabilities. We have found that an online catalogue to be the most effective way for our distributors to see our current work, while saving energy and resources on print materials that rapidly become out of date.

Additional Online Content: Think icon means that there is more information available on the Crystal Sensations website. Click on the icon to navigate to relavent web pages. You can also find hot-links within text to bring you to more information.

Welcome to our world, where amaZing artistic design and cutting edge laser technology converge. This defines Crystal Sensations®. Thinking beyond the concept, seeing beyond the obvious. Welcome to the Zing Team at Crystal Sensations.

This catalog illustrates our versatility and showcases the manner in which sophistication and creative designs are transformed into dynamic awards and gifts. Featured throughout the following pages are examples of projects which have been commissioned by corporate, non-profit and government clients.

Whether your choice ranges from functional simplicity to the extravagant, we invite you to engage the Zing Team at Crystal Sensations to create an amaZing gift that is guaranteed to impress.

All stages of design and production are completed in-house, thereby ensuring total quality control throughout the entire cycle. We hope that you will join the thousands of clients that have entrusted their brand to us, and we look forward to working on your next project.

Crystal Sensations offers a unique process called <u>» True Tone™</u>, enabling photo-realistic dimensionality within crystal. With detail beyond anything ever imagined, any design, photo, animal, human, nature or product subject can be engraved Another great competitive advantage that Crystal with stunning realism.

Once a file has been created, laser energy, containing tremendous heat at its focal point, is induced into the crystal, vaporizing the crystal at each coordinate point. As the laser is moved within the crystal, injecting engraved points with

micron precision, and with unimaginable speed, the image begins to take form. The outer surface however, remains unmarked.

Sensations has is that the technology utilized is proprietary and of the highest quality, thus ensuring the most accurate image reproduction to be found anywhere.

### **COLOR OPTIONS**

### Enhance the look of any crystal award with color:

- Sand Carving the crystals allow for external surfaces to be deeply etched and then hand painted with color.
- V-Groove awards elegantly places full color logos, text and gradient color designs inside the crystal.
- MircoResolution<sup>™</sup> process allows for photo quality color artwork to be directly applied on the surface of the crystal. Coupled with surface engraving and <u>winternal 3D laser engraving</u>, one can truly appreciate the adage that 'Image is Everything'!

#### CONCEPT

Engage us. Create. We will take your concept and breathe life into it. We work from sketches, blueprints, photos, art work, and CAD files. Don't have art? No problem! We create custom images from scratch. amaZing!

## DESIGN 🥙

Our designers work their magic by computer modelling your image, logos and text - enabling them to visualize your concept three-dimensionally. The experience and expertise of our artists are what distinguishes Crystal Sensations award from the "pack".

#### **ΔPPROVAI**

Our visualization software provides a realistic multi-view proof of the finished crystal for client approval — before any crystal is actually engraved. Fine tuning and design revisions can be made prior to production. We take pride in recommending the most suitable shape and size of crystal to compliment your layout and budget. For complex or large projects, a prototype sample is produced for final client approval before commencing the full production run.

#### PRODUCTION

The approved design is downloaded into specialized software creating x-y-z coordinate "points" for crystal engraving. Laser energy, containing tremendous heat at a fixed focal point, is induced into the crystal, vaporizing the crystal molecules at each coordinate point. As the laser is moved within the crystal, engraving tiny dots with micron precision, the image begins to take form. The outer crystal surface however, remains unmarked.

#### COMPLETION

Great concepts can be "crystallized" into any quantity. Each award can be personalized with an individual name, date, or limited edition number. Your artwork remains on file, so it's easy to reorder or update your concept in the future.

## CUSTOM TROPHY DESIGN WITH ART GLASS

The official Awards Supplier of the TransAm Road Racing Series

Trophy envy! A trophy which inspires road racing competitors to win. The inaugural TransAm Road Racing Series trophy was designed using art glass. A "slick" design which resembled "motor oil" twisting and turning into the shape of a race track.

The buzz and excitement created in the winners' circle in 2012 was 2nd to the engines racing for the finish line. For 2013 another unique design, incorporating the black and red colors of the TransAm Road Racing Series, motivated the drivers across the finish line.

Have a unique event of competition and need to make an impact?

Get the Crystal Sensations Zing Team designing for you.

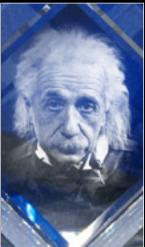

## ORIGINAL PORTRAITS

Create 3D subjects with incredible detail. AmaZing! That "perfect moment in time" can be transformed in to a breathtaking 3D image in crystal, forever. Combine our 3D portrait imaging with a logo and event information to commemorate any corporate function.

## 2D-3D PORTRAIT

The Ultimate in Personal Recognition!

Develop a 3D portrait from a 2D photo. Crystal Sensations digitally models the images from photos and transforms them into three dimensional works of art.

Norman Rockwell's famous "Triple-Self-Portrait" illustrates the amaZing ability of the Zing Team.

# STANDARD PACKAGING

Every Crystal Sensations award is elegantly packaged in a protective gift box. A layer of foam and fabric, sturdy cardboard box, and a protective shipping sleeves ensure that your awards will arrive in perfect condition for presentation.

6CB3W

CM: 6 x 6 x 6

Cut Corner Cube

13CB4W

Add personalizations to your laser engraved crystal on the surface to give your crystal texture and depth.

5CCB2W

Perfect for themes, figures, text and more. They can be displayed vertically or horizontally providing both optimal size and visual impact. Thin cut rectangles are the ideal choice when less depth is required. If required, custom sizes can be created to best showcase any design.

# LARGE SCALE IMAGERY Crystal Sensations can engrave images into large glass panels. Display panoramic artwork or photographs in an amaZing way! Applications include room dividers, doors, tabletops, donor walls, lobby displays and windows. Whether placing it in a boardroom, bar, restaurant, or even your home, the possibilities are endless! All can be engraved so the surface of the glass remains unmarred. Perfectly smooth to touch, with your artwork engraved inside! In addition to laser engraving, Crystal Sensations can provide deep sand etched surface engraving and cold fusion crystal bonding. Commission an art form that is a unique masterpiece!

For a complete product listing refer to the Specifications section on page 64

SPECIFICATIONS

Native file formats (such as DXF or IGS, from an animation program such as 3D Studio Max or Maya). Other formats may also be acceptable such as: DWG, OBJ, STL, VRML.

#### 2D LOGO

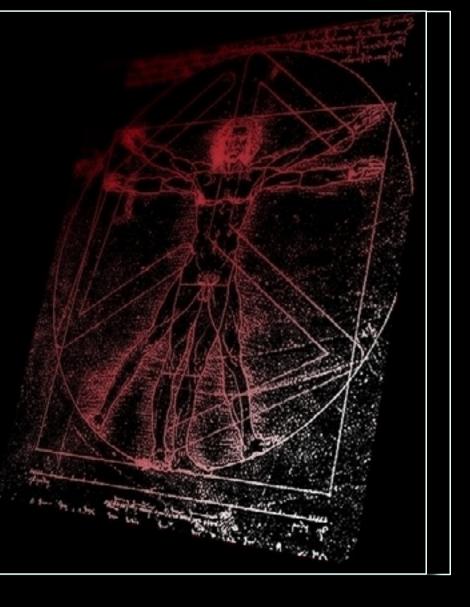

Illustrator eps vector based files. Please note that they must be vector format, though they may be saved as pdf. Eps format files that are simply jpgs may be fine to view, and show us what your logo looks like. However, these files lack the sizing information of vector files needed for our design software.

### TEXT

Just email us text content, and indicate the font type, style and approximate size you would like. If the text is a custom font treatment, send an Illustrator vector file.

### PHOTOS AND 2D ARTWORK

JPEG or native Photoshop files (PSD), with minimal compression artifacts. Also BMP, CDR, EPS, GIF, IFF, PCD, PDF, PIC, PNG, PPT, TIFF (TIF).
