and EQP pricing
on your first order
of 500 or more!**

* Hospitals and clinics provide a case to patients undergoing a procedure. When patients are in pre-op they are asked to put their personal possessions in a bag. Glasses are fragile. When we toss a \$500 pair of glasses in a bag with a \$50 pair of sneakers, it is not the shoes that get damaged. An inexpensive case makes for problem solved!

The best part is that most hospitals and clinics who pick up on the program re-order almost every quarter, meaning one sale will pay reorder dividends for years to come!
